Hydration App

home screen

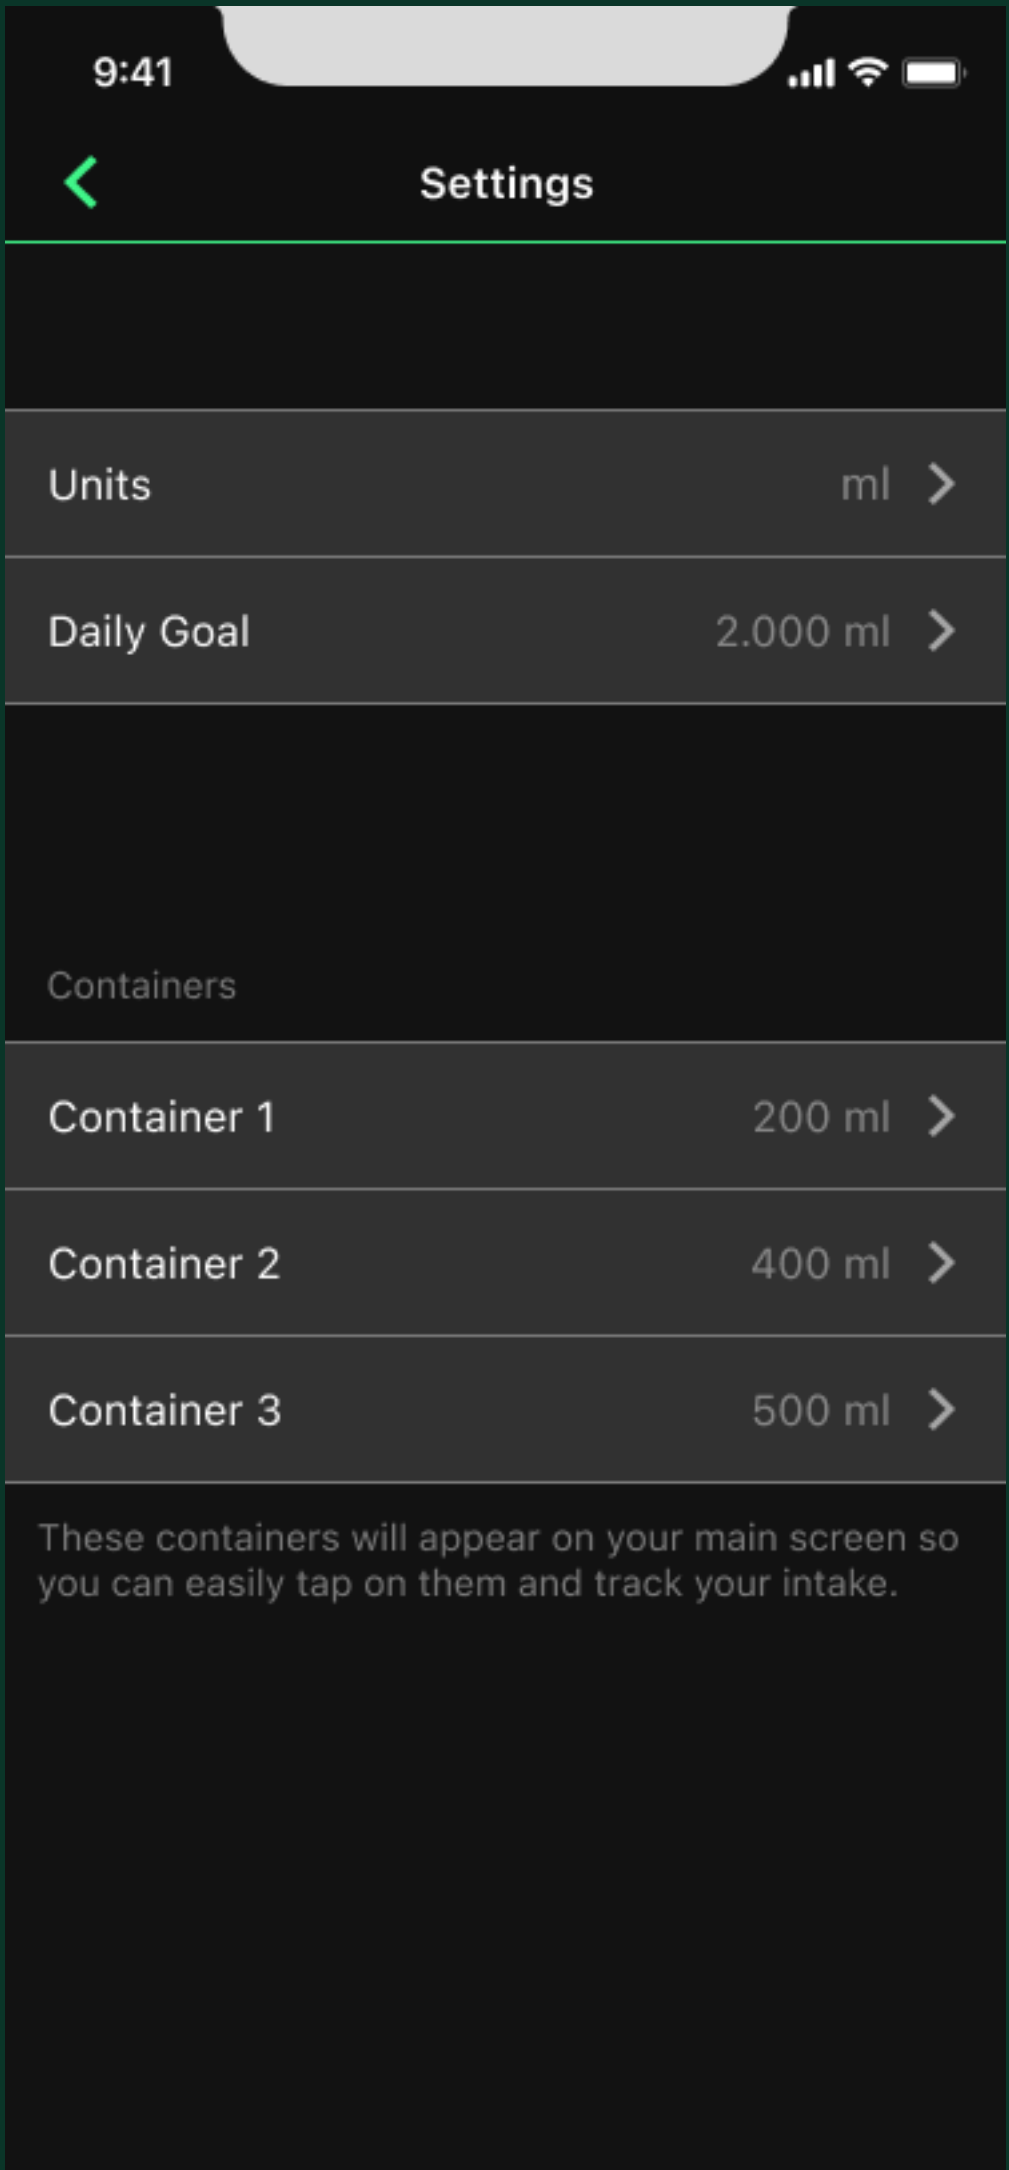

As a user, I want to be able to track my daily hydration level (based on my preferred unit of measurement) so that my tracked data is available for later viewing to help me monitor my overall health.

As a user, I want to be able to input hydration data (based on my preferred container sizes) throughout the day so I can better keep track on my liquid consumption.

Hydration App

settings screen

As a user, I want to be able to specify the unit of measurements for liquids (imperial/metric) so the value I'm tracking is relevant to my lifestyle.

As a user, i want to be able to specify what's my hydration goal (based on my preferred unit of measurement) and if I have reached that goal so I can monitor daily healthy fluid intake.

As a user, I want to be able to specify 3 container sizes (based on my preferred unit of measurement) so it would be easier to enter my daily liquid intake.

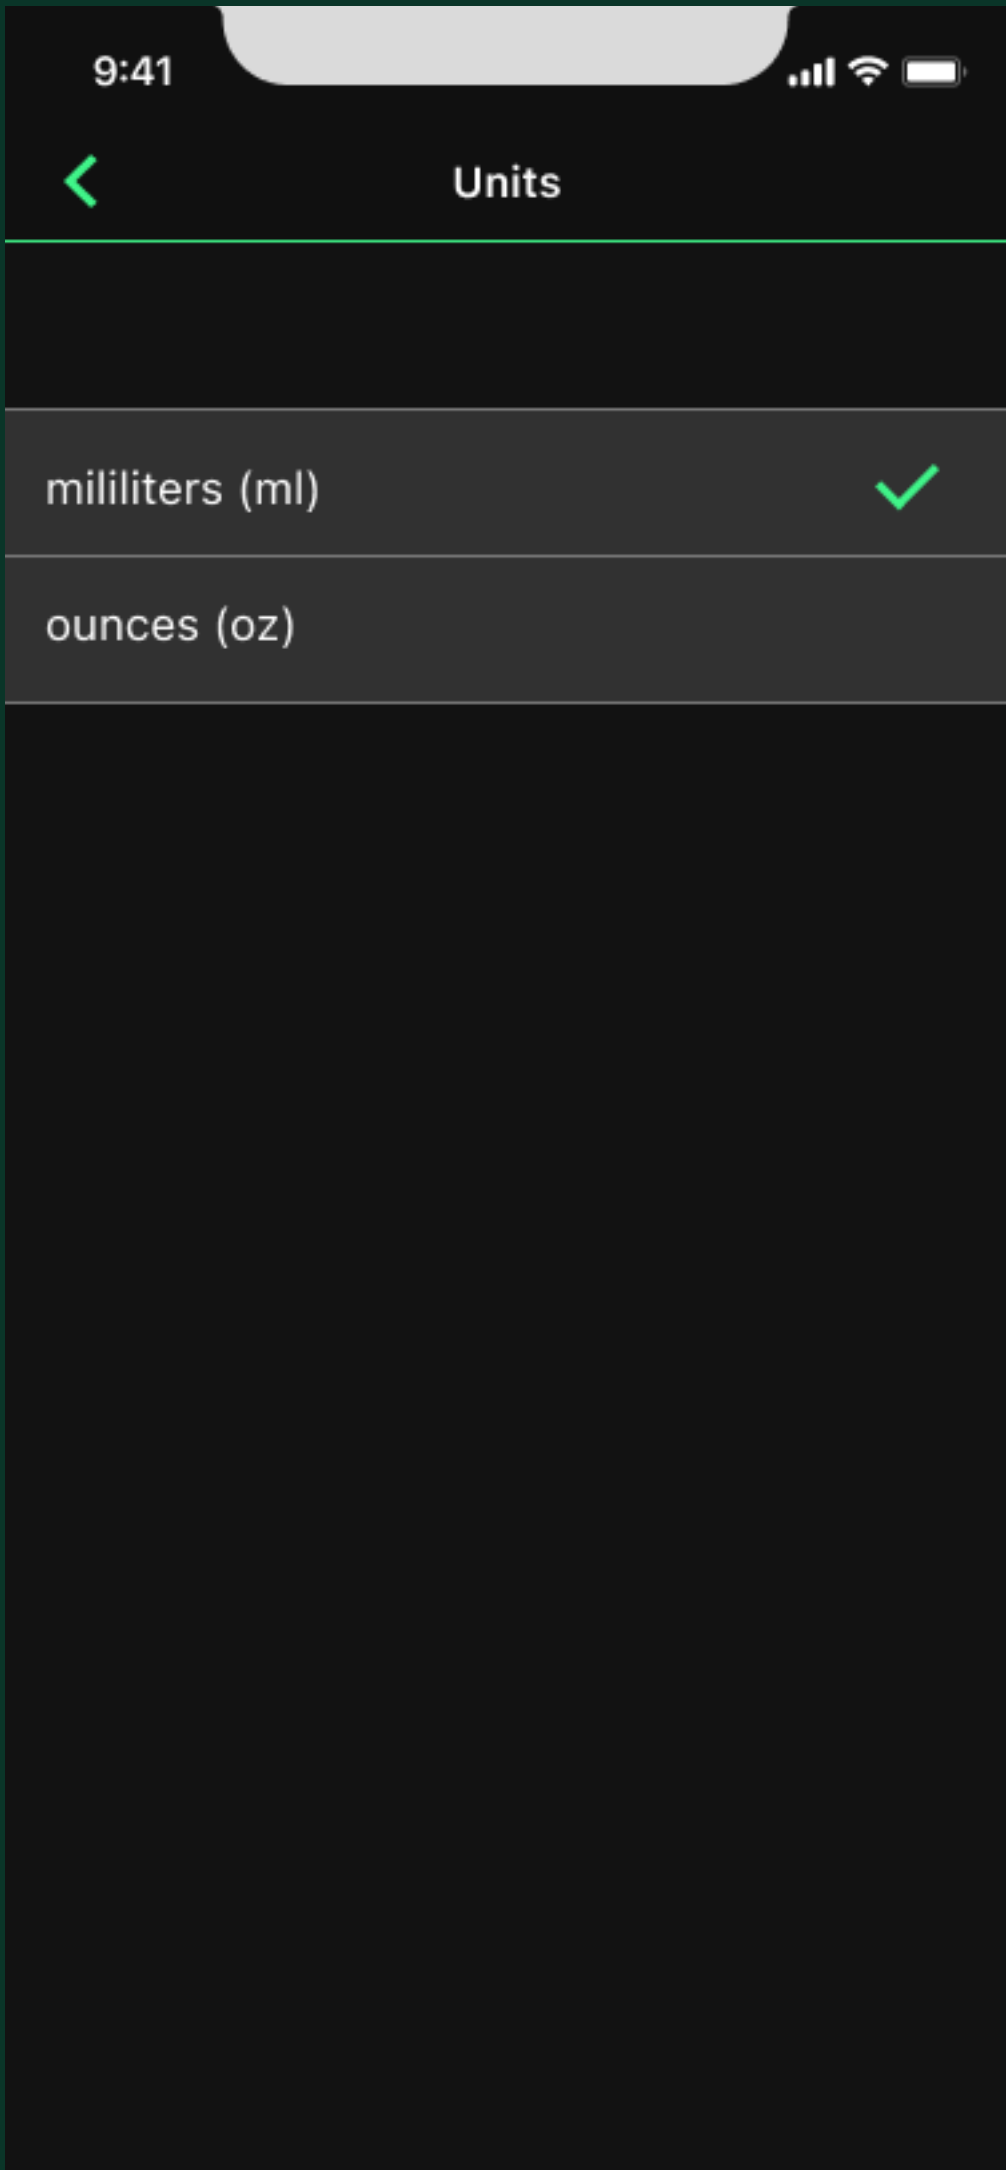

Hydration App

units screen

As a user, I want to be able to specify the unit of measurements for liquids (imperial/metric) so the value I'm tracking is relevant to my lifestyle.

Default is 2000 ml.

Hydration App

daily goal screen

As a user, i want to be able to specify what's my hydration goal (based on my preferred unit of measurement) and if I have reached that goal so I can monitor daily healthy fluid intake.

Hydration App

history screen

As a user, I want to be able to see my historic hydration data for the last 30 days so I can better monitor my overall health.

Hydration App

container size screen

As a user, I want to be able to define 3 container sizes.
